

Fly Into Our NEHST

Branching Activities for Hibernation

Make your own Hibernation Day—we all need a break once and awhile! Put on your pjs, a fuzzy pair of socks, and grab a cup of hot chocolate as you relax and rest!

Nature Education
for

HOMESCHOOL

Students & Teachers

Make an Ice Sun Catcher

1. Fill a container (cake pans, pie pans) with natural treasures (twigs, berries, pinecones, etc.)
2. Add Water
3. Freeze
4. Pop out of the container and hang outside (yarn or ribbon work well!)

Adopt a Tree—The next time you are on a walk in a familiar area, choose a particular tree to observe. Revisit this tree on a regular basis throughout the year and in a variety of weather conditions. Observe what changes happen with your tree!
