BRANCHING ACTIVITIES FOR METEOROLOGY

Can Animals Predict The Weather?

Did you know many animals are affected by changes in air pressure? Read this article on animal folklore to find out what critters are considered meteorologist!

[Weather Predicting Animals](#)

Salt Crystal Snowflakes

Snowflakes come in all different patterns. No two are alike! Create your own with salt, water, and pipe cleaners!

DIY Weather Station

Make An Anemometer

In meteorology, an anemometer is a device that measures wind speed and direction. Wind speed is important for pilots, marine navigation, and wind farms.

Measure Rainfall

Rain is an important part of weather and our lives. For example, without rain, our crops wouldn't grow.

Make your own rain gauge to determine how much rainfall you get.

[Rain Gauge](#)

Make A Barometer

Changes in air pressure are measured by a barometer. Meteorologists are able to tell if it will be mild weather with clear skies or cloudy, rainy weather by using a barometer.
